MARIJUANA	POSITIVE		
Cannabinoids/THC Screen		5 pg/10 mg	
CarboxyTHC	Positive MS 130 pg/10 mg		0.5 pg/10 mg

- Sample received with Chain of Custody Intact.
- A "Negative" result means that the drug was not detected in an amount that meets or exceeds the cutoff. A "Positive" result means that the drug was detected in an amount that meets or exceeds the Mass Spec cutoff.
- Technical questions concerning these results should be directed to the Laboratory Director. Please contact your Client Services Representative for assistance.
- Psychemedics conforms to the recommendations of the Society of Hair Testing and utilizes a Thermo Quantum GC/MS/MS instrument (tandem MS) with deuterated internal standards for the accurate measurement of Ethyl Glucuronide in hair.

I Certify that the sample identified by the Lab Identification Number on this result has been examined upon receipt, handled and analyzed in accordance with applicable procedures, and that the results set forth above are for that specimen.
